

INTRODUCING

Heat Trace Shower with **Halo** Technology

Safe, Fast Relief in Extreme Environments

**FREEZE
PROTECTION
DOWN TO
-50°F/-46°C**

Bradley Heat Trace Showers are engineered to ensure water doesn't freeze in the fixture. These durable freeze protected showers help keep employees safe in extreme, frigid environments and are the best choice for the toughest industrial applications – install outdoors at petrochemical facilities, offshore platforms, oil and gas refineries, power generation plants, mines, and more.

NEW

S19-304 Series

Heat trace combination unit with integrated Halo eye- or eye/face wash will not freeze when installed in a frigid environment, indoors or outdoors, down to temperatures of -50°F (-46°C).

Heat trace fixtures are available with an optional signaling system, indicator light, extension cable, drench hose, stainless steel material, and anti-scald valve to complement this premium emergency fixture.

- **General area and hazardous location** models
- **Freeze protection** down to -50°F (-46°C)*
- **Freeze protection valve** ensures continual flow of water should power fail in cold temperatures
- **High-visibility** fixture is insulated and covered by a yellow ABS plastic shell
- **Signaling Systems** can be easily added to all units
- Certified to **ANSI/ISEA Z358.1** and **cCSAus listed**
- **NEMA 4X** standard
- **SpinTec™ shower head** improves water distribution and provides the most effective washdown in the industry
- **Halo eye/facewash** for 85% facial coverage and 20% better protection – the best contaminant relief available through superior coverage and wash pattern
- Bowl and dust cover always included
- Standard and configurable models available – go to bradleycorp.com for more information

*ANSI/ISEA Z358.1 Section 6.4.5

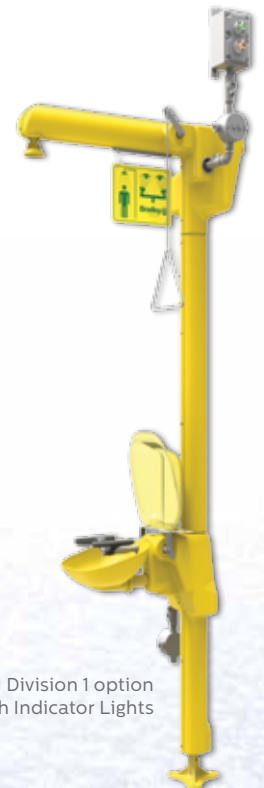

In geographic areas where an emergency fixture may freeze, safety personnel should consider purchasing a freeze protected fixture or additional accessories to prevent the pipes from freezing.
