

KV Glass Shelf Kit Installation Steps

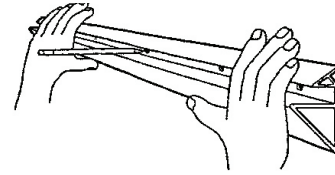

6" x 18" Shelf Size
Cat. No. 89WH10618
8" x 24" Shelf Size
Cat. No. 89WH10824

Assembly Instructions:

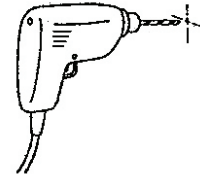

1. Determine Shelf location and mark center hole through the wall mounted Shelf Bracket.
NOTE: The Shelf Bracket contains two center holes from which to choose. This allows you to choose a hole and locate the Shelf Bracket over a wall stud. If unable to do so, hollow wall fasteners (not included) are recommended.
2. Remove the Shelf Bracket and drill 1/8" (3 mm) pilot hole.
3. Fasten the Shelf Bracket through center hole with one of the three screws provided. Tighten screw, allowing for slight rotation of the Shelf Bracket.
4. Place level on top edge of the Shelf Bracket. Make sure the Bracket is level before marking location for drilling the remaining holes, at the right and left ends of the Shelf Bracket.
5. Rotate the Bracket to expose marked drill location. Drill remaining holes. Rotate the Bracket to level position and secure the Bracket with remaining screws. Tighten all screws securely. Do not over tighten.
6. Insert Rubber Cushion Strip into top lip of the Shelf Bracket. Make sure that the large flap is toward the wall (see illustration #6b).
7. Insert End Caps into each end of the Shelf Bracket. Insert Glass Shelf all the way into the Bracket slot. Center shelf so it is even on both ends. **NOTE:** If you experience difficulty inserting the Glass Shelf, lightly coat its back edge with liquid dish soap. Be sure Glass Shelf is in contact with the Rubber Strip.

You're finished! Just wipe off fingerprints and your new shelf is ready for display.
