# LOOX Mounting / Programming Instructions: Item no. 833.74.708

- **The following are programming instructions for the Loox RGB Remote for the 12v Color Changing Control System.**

- **The Wireless Remote, item 833.74.708, works with the 12v (833.74.802) Mixer Module.**
- **Up to 10 Mixers can be paired to a single Wireless Remote.**
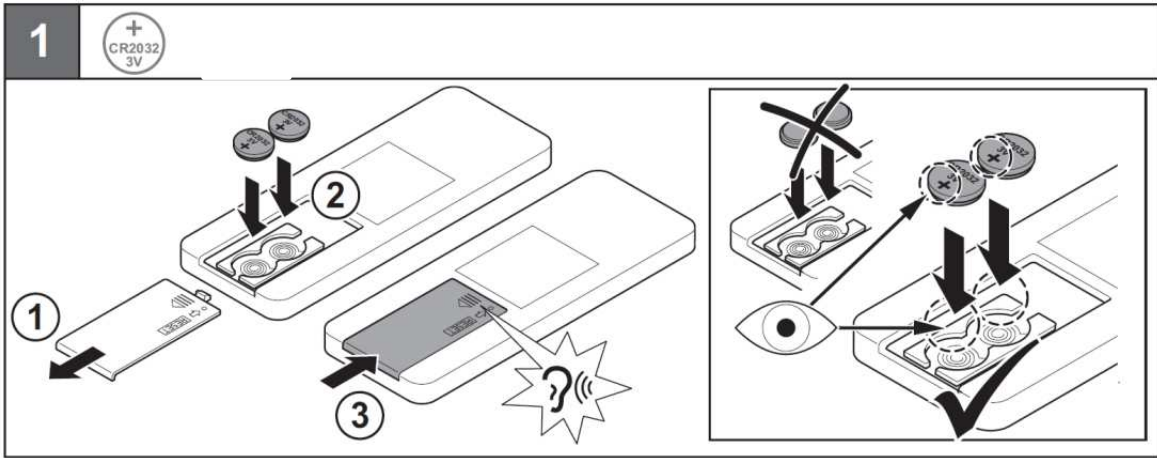

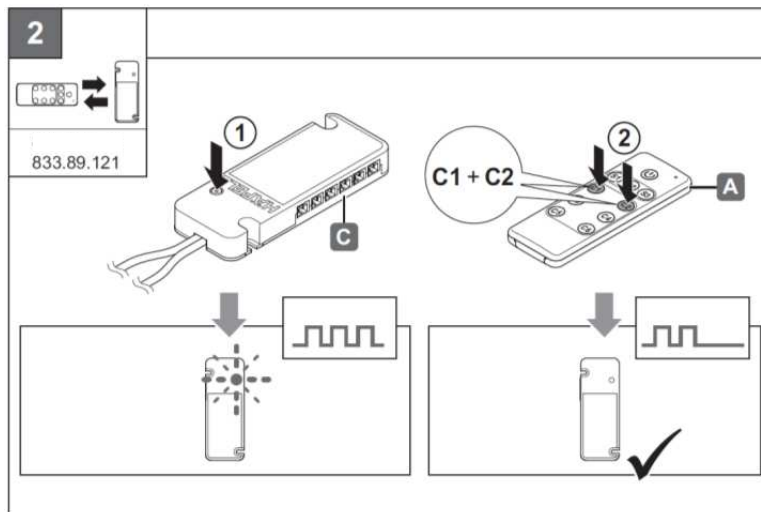

LOOX Mounting / Programming Instructions: Item no. 833.74.708

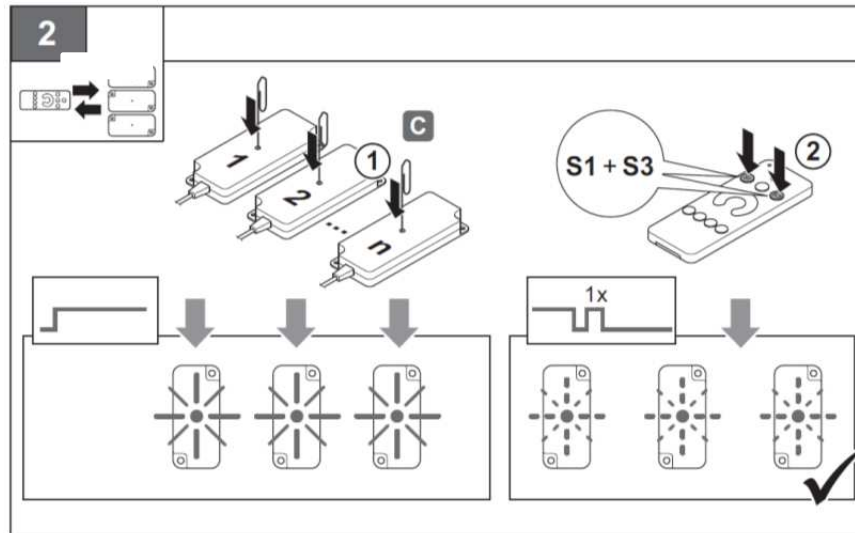

Installing the Battery

- **To install or replace the battery (type CR2032, 3V), remove battery cover.**
- **Pay attention to battery orientation (+ faces the battery cover).**
- **Slide battery cover into place until the cover snaps closed.**

Pairing the Wireless Remote to the Mixer Module:

- **Press button located on Mixer Module Top Cover.**
- **Button will illuminate solid blue....**
- **Press S1+S3 buttons together on Wireless Remote.**
- **The Blue light on the Receiver Module will turn off, on and back off.**

# LOOX Mounting / Programming Instructions: Item no. 833.74.708

- **Pairing multiple mixers is handled the same as the first.**

- **Syncing multiple mixers is handled by assigning one mixer as the main or master mixer.**
- **Simply depress the center button of the intended main/master for > 5 seconds. That mixer LED will then flash blue continuously.**
- **To decommission a mixer from master mode, depress the same center button again for > 5 seconds. The LED will stop flashing blue.**
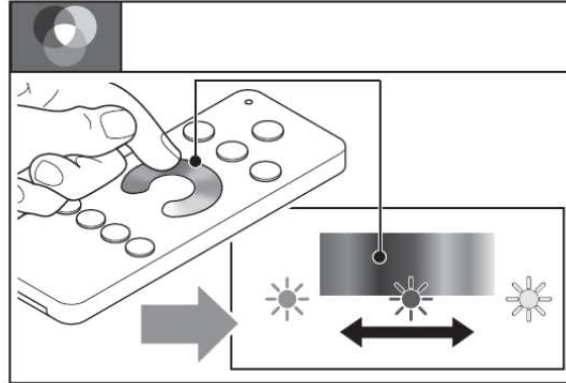

LOOX Mounting / Programming Instructions: Item no. 833.74.708

- **Test the pairing by pressing the power button** ⏻
- **Operating range of the remote to the mixer is 16m or 52 ft.**

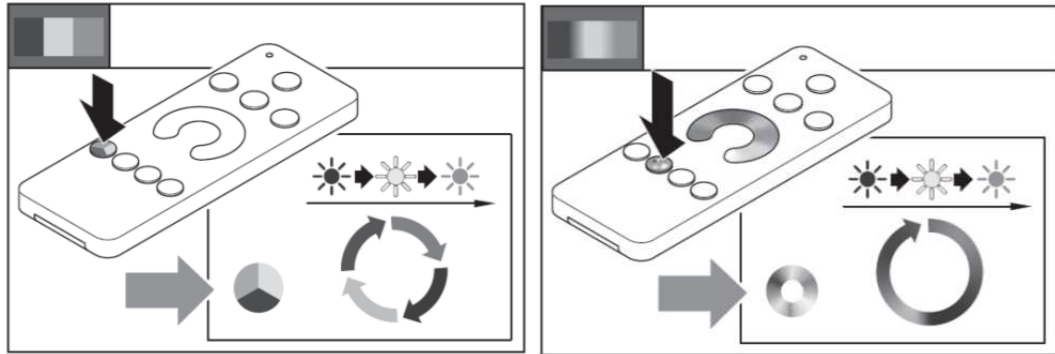

Dimming:

- **Dimming all lights can be achieved by pressing and holding the power button ⏻ for greater than 3 seconds.**
- **The dimming is not cyclical. Holding the button initially only dims in one direction. To reverse the dimming, re-press the same button longer than 3 seconds to increase the light intensity.**

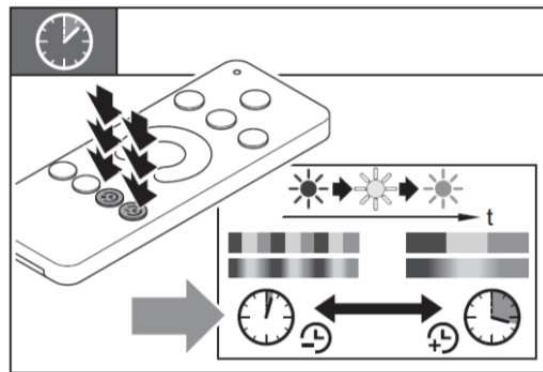

Color Adjustment:

- **The Color Arc is a touch pad that allows the user to dial in the color like an iPod.**

Scene saving:

- **It is possible to save colors that are able to be recalled with a single button.**
- **Once the desired color is achieved, the user may then save the setting to a Scene.**
- **Press and hold the S1, S2, or S3 button until the lights blink in confirmation of being saved. Up to 3 scenes can be stored in a Wire Remote.**

Resetting the Wireless Remote:

- **It is also possible to reset a remote and break communication with all associated Receiver Modules.**
- **Locate the reset button on the back of the Wireless Remote.**
- **Using a paperclip, press and hold the reset button longer than 5 seconds.**
