

ChefsTable

KESSEBÖHMER

The ChefsTable from Kesseböhmer is the newest development in space optimization for kitchen counters, specifically when it comes to small kitchen appliances.

Item No.: 543.34.987

Engineered for easy retrofitting and a load capacity of 35 lb. for lifting heavier appliances, the ChefsTable installs seamlessly within the cabinet interior. The appliance lift swings up and stands securely when needed, then gently folds back down – remaining out of sight and out of the way when not in use to ensure a clean, pristine aesthetic.

It is outfitted with a trimmable stabilizer bar that reduces shaking and movement while small appliances are being used on it, making it perfect for kitchen mixers, blenders, air fryers and more.

This lift is suitable for base cabinets 400–600 mm (18"–24") wide and installs behind hinged doors. Just screw on the left and right, attach the synchro rod, attach the work surface - DONE!

AT A GLANCE:

- > Supports devices up to 35 lb.
(42 lb. total load capacity when weight of top is included)
- > Easily retrofitted into existing kitchens
- > Trimmable stabilizer bar
- > Suitable for base cabinet width: 400–600 mm (18"–24")
- > Work surface is customer supplied
