

# Combination 78

Art. no. 33655

Page 1 of 1

## Technology

- 3-digit code
- Protected against manipulation
- 78KC (Key Control): Master key function, ideal for schools, etc.

## Operation and use

- The padlock ABUS Safe Code 78 is operated like a safe lock, by turning the wheel to the given numbers. The casing is KTL-coated (the coating is applied by a cathodic dip coating) for a high corrosion resistance and the shackle is made of hardened steel. The combination padlock 78 is suited to secure cabinets, lockers, switchgears, etc. Especially practical is the handling without a key by means of a 3-digit code. In the executing "Super Code 78KC" the integrated master key funktion ensures that the padlock can be unlocked with a master key. Several padlocks for different persons can be used by means of a number code and a higher-level person can operate all locks iwth the master key; ideal for schools.

## Variants

- Key Control version (KC) available
