

Air Jack - Air Wedge

This must have tool allows you to create the necessary gap to insert your long reach tool.

The Air Jack from Access Tools is the industry's best. The bladder is made out of ballistic nylon, not rubber, which is important because rubber stretches, while the nylon doesn't.

The Air Jack is available in four sizes; Super Air Jack for large vehicles, Air Jack for all vehicles, Twin Air Jack for stiff, door frames and Mini Starter Air Jack for newer vehicles with soft b-pillars. To further aid insertion, there is a built in stiffener that prevents the wedge from bending when you insert it.
