

INTRODUCING THE ALL-NEW ADC251

Master OBD Cable With LED Light

OUT NOW

Advanced Diagnostics have introduced the **NEW master OBD cable**, incorporating an **ultra bright LED light** which can be used as an alternative option for ADC250.

Please note: ADC251 may not be compatible for all vehicles due to the connector housing size. Simply press and hold the ON button located on the connector housing to activate the LED light, releasing the button turns the LED off. This revised cable makes searching for the vehicle OBD port much easier, especially when the port is located under the dashboard in a dark location.

ADC251 Functionality

- Uses a 27A 12v Alkaline Camera Battery (Not Included)
- Makes searching for the vehicles OBD Socket in the Dark Much Easier
- Built in Ultra Bright LED
- Can be Used On Most Makes Of Vehicles

The new OBD LED light makes it easy to locate the vehicles OBD Port.
