

▼ Backset

1-3/16" (1.25 including faceplate).

▼ Case

1/2" x 4 x 1-19/32" deep. Stainless steel. Bolt is laminated stainless steel.*

▼ Faceplate

5/8" x 4-1/2" with radiused ends. Stainless steel.*

* Also available in zinc-plated steel.

▼ Operation

45° rotation of turn or key throws or retracts bolt. Bolt is self-protecting: if door is shut while bolt is extended, it will retract, preventing damage or accidental lockout.

Wood Door Deadbolt

5017

ANSI/BHMA Type E8292 (Grade 2)

5017

**4810
Box
Strike**

▼ Function

For wood framed sliding doors the 5017 Deadbolt provides the same thousand pound strength that the MS1847 Deadbolt provides for metal stiles. A deeper backset clears the recessed jamb used with wood doors. Bolt throw is easily adjusted by means of a screw in the faceplate. Mounting is by through-bolts, which also secure the inside turn and outside cylinder when installed.

▼ 1015 Turn

Available with 1016 blank plate shown for doors from .625 to 2.25 thickness. Without blank plate turn available (for use with cylinder pull) on doors from 1.42 to 2.00 thickness. Standard finish Ritecoat 130, Satin Aluminum enamel.

**1016
Plate**

▼ 4026 Cylinder Pull

Five pin-tumbler cylinder in zinc alloy housing. Standard finish Ritecoat 130 Satin Aluminum.
