

Why your customers need HPC Under & Over Car Opening Tools

Many times the Under & Over Opening Method is the best option for unlocking a vehicle. Due to the wide variety in the shape and thickness of doors, locksmiths need an assortment of these tools in different sizes.

How to sell HPC Under & Over Car Opening Tools

Key Selling Points:

HPC invented the first Under & Over Tools, and now offers 4 different models. The design of each tool incorporates varying structural differences in the:

- * Thickness of the interior door panel
- * Location of the handle or switch
- * Depth of glass in the door

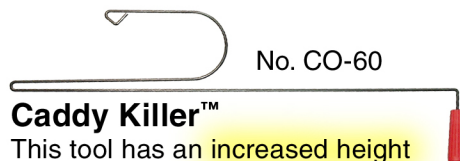

All of these precision-made tools feature a closed-hook end that protects the interior of the vehicle and eliminates the chance of hooking linkage or wires inside the door.

No. CO-59

Original Killer

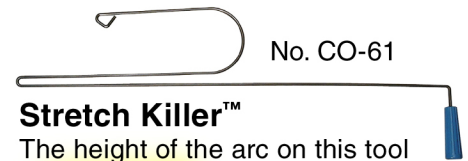

This tool was the first of its kind on the market. It slides into the door cavity, under the glass, up into the vehicle, and then reaches over the door panel to activate the lock mechanism.

No. CO-60

Caddy Killer™

This tool has an increased height in the arc for use on vehicles where the glass is deeper in the door, and the closed-hook end hangs higher for use on vehicles where the lock mechanism sits high on the door panel.

No. CO-61

Stretch Killer™

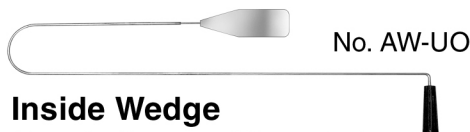

The height of the arc on this tool is even greater than on the Caddy Killer™, and the closed-hook end hangs lower for use on vehicles where the lock mechanism sits low on the door panel.

No. CO-70

Super Killer™

This tool has the tallest and widest arc of all Under & Over Tools, allowing it get under the deepest window and around the widest door panel.

No. AW-UO

Inside Wedge

To make the use of these tools even easier, HPC developed the Inside Wedge. This tool creates a gap on the opposite side of the glass for easier insertion of the Under & Over Tools.
