

# Specialty Tubular Picks

## 7-Pin Offset

The **7-Pin Offset** is designed especially for offset pin tubular locks. As a measure of extra security, some locks utilize an offset pattern of spaces, the pins are positioned half a space off from the standard pattern. The feelers on this pick are positioned to match this offset pattern. Some locks use an 8-pin split-center pattern. The Offset Pick has the eighth feeler to also defeat these locks. The pick includes an adjustable collet to control the tension on the feelers. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FEEL Feelers only).

## Guard

Some vending machines are equipped with a dome-shaped shroud over the lock to guard it from vandalism and break-ins. These installations require a special tubular key with a long shank to access the lock through the shroud. The **Guard** Pick has a similar design to effectively defeat 7-pin locks with these guards. The pick has a knurled collet for adjusting the tension on the feelers and a reset lever to return the feelers to their home position. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FL-GUARD Feelers only).

**Guard**  
**No. TLP-GUARD**

## High Security

The **High Security** Tubular Pick can defeat the ultimate in tubular lock security; the pin-within-a-pin design that Underwriters Laboratory originally deemed pick-proof! In 2, 3, or 4 of the chambers on these locks there is a secondary pin that must also be moved to the shear line to open the lock. This pick has secondary feelers in all positions to defeat these locks. It has a collet to adjust the tension on the feelers, and decoding lines to read the code directly on the pick. Comes with a genuine leather case (No. COMP-CASE).

**High Security**  
**No. TLP-UL**

O.D. - .402" (10.21mm)

## 7-Pin Mini Bore

The popularity of laptop computers has led to an increase in the use of special locking cables to secure the computers. This has led to an increase in locksmiths needing to pick the small tubular locks on those cables. Similar to other HPC Tubular Picks, the **7-Pin Mini Bore** Tubular Pick allows you to quickly manipulate all seven pins at one time and open the lock in seconds. Be prepared for students and coffee house surfers that lock down their laptop and misplace their keys. Comes with a genuine leather case (No. TLP-CASE). (No. TLP-FL-7MB Feelers only).
