

Why your customers need the HPC Clean-Grip Impressioning Tool

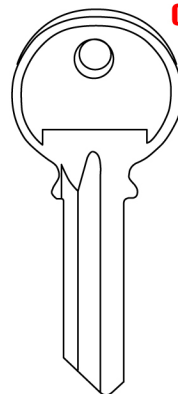

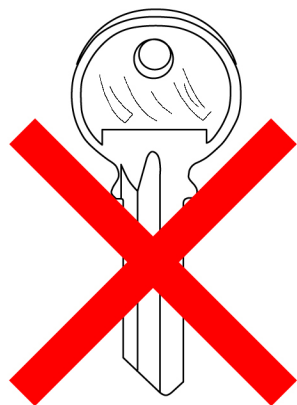

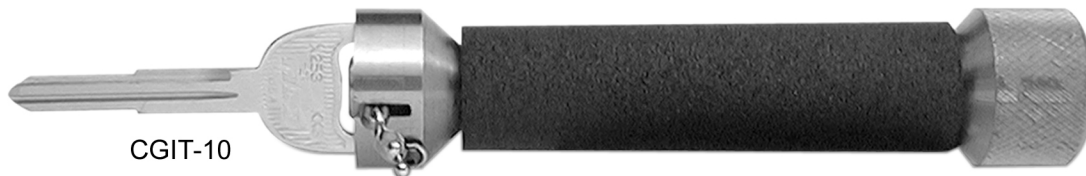

Impressioning is a special trade service that only locksmiths offer. They need reliable tools designed to help them create new, good-looking keys quickly, accurately, and professionally.

How to sell the HPC Clean-Grip Impressioning Tool

Key Selling Points:

- * Locksmith tools should be made to last. The HPC Clean Grip Impressioning Tool is solid steel and will last a lifetime! Competitive plastic tools have weak threads that wear out quickly.
- * The HPC Clean Grip Impressioning Tool is a locksmith tool specifically designed to impression locks. It grips on the blank's centerline at three points giving you the optimum holding force needed for impressioning. Real impressioning tools are specialty tools that are not found in hardware stores. Don't settle for a pair of locking pliers that twist and slide as you try to impression a lock.
- * The HPC Clean Grip Impression Tool is the only impressioning tool that does not ruin the face of the key because it holds the key by the edges, not the face. Historically, impressioning tools have always gouged, scratched, and scuffed the face of the blank forcing you to duplicate a new key before the customer would accept it.

Completely Clean!

Get a new key into the hands of your customer faster with the HPC Clean Grip Impressioning Tool.
