

Why your customers need HPC Long Reach Car Openers

In-the-door openings have become more difficult because of side-impact air bags, hidden linkage, and tighter weather stripping.

How to sell HPC Long Reach Car Openers

Key Selling Points:

- * **Prevent Damage** - Avoid air bags and other internal mechanisms by opening the vehicle with the Through-the-Car method.
- * **Different** - What separates these tools from other manufacturers and importers is that HPC's tools are actually mini-machines that mimic your hand movements inside the vehicle.
- * **Creative** - These tools vary in length from 5 to 7 feet long. By manipulating the handles on one end the other end twists, turns, grips, and grabs handles, switches, and buttons as if you were sitting inside the vehicle.
- * **First and still the Best!** - HPC has been offering tools for this opening method for almost 50 years and is definitely the expert!

The **Collapsible Opener** (CO-6) is made of three parts that screw together to make a hook-end tool 5-foot long.

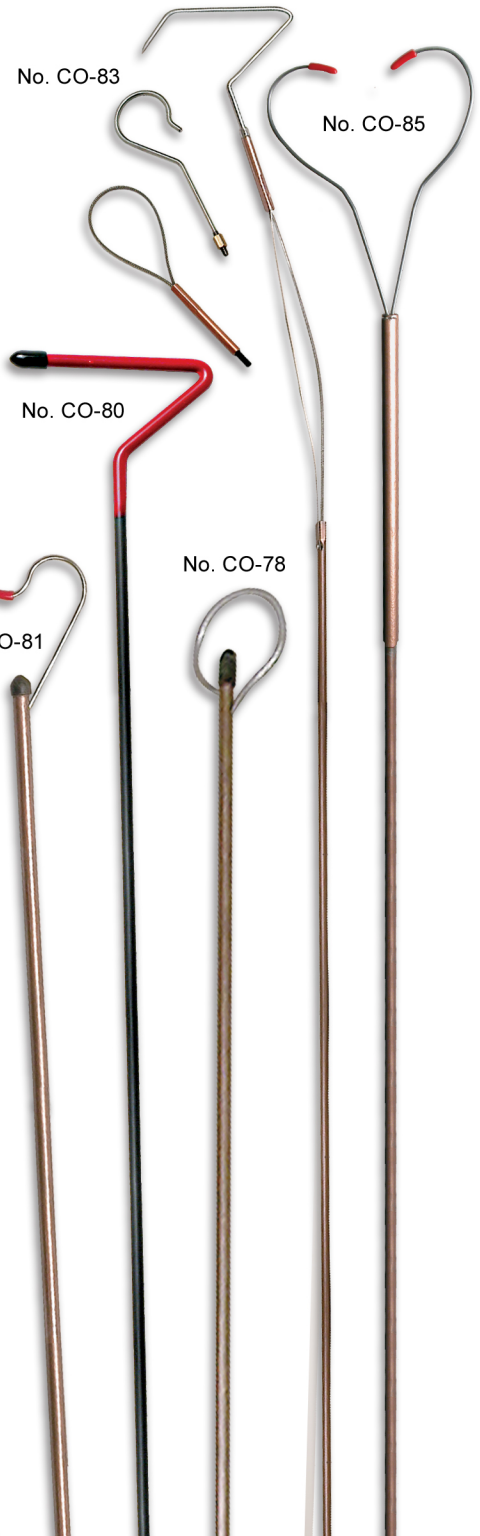

The **Switch Stick** (CO-80) is a 5-foot long bendable tool that is ideal for fingertip-flip buttons.

The 5-foot **Thru Car Clutch™** (CO-81) and 7-foot **Super Thru Car Clutch™** (CO-82) come with a retractable hook end that can be opened and closed around levers and key chains.

The **5-foot Super Snare** (CO-78) acts as a lasso to encircle levers and buttons. When you separate the handles the loop closes pulling your captive snugly up against the small rubber tip allowing you to easily pop open the lock.

The **Twin Hooks** (CO-85) is a 7-foot long tool that easily reaches across cars and vans. This tool is thin enough to fit between doors and frames and opens up a 3.5" gap between the two hooks. Once you snare what you are after the hooks overlap as they close giving optimum pulling force.

The HPC **Fishing Pole** (CO-83) is a 7-foot long tool with a bendable body that can be configured into any shape. By manipulating the handles the working end of the tools quickly flips back and forth, like your wrist, but more than 90 degrees. The Fishing Pole comes with three different screw-on tips including a bendable posi-form wire loop, a super-pull catch, and a large sure-grip hook, for use on virtually all vehicles.
