

Why your customers need the HPC Lever Wedge™

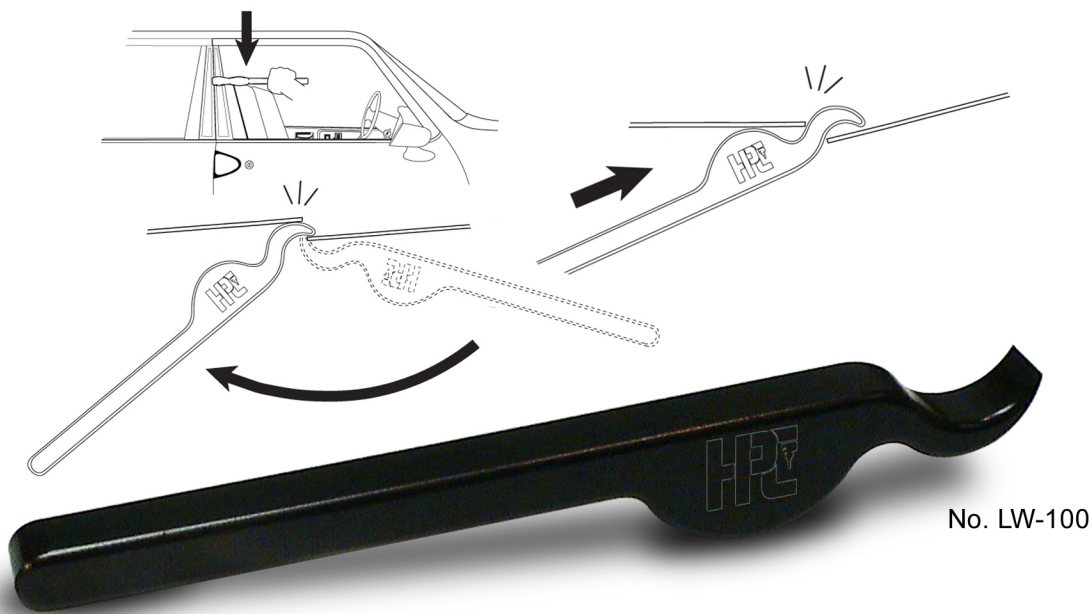

Locksmiths need a fast method for safely spreading vehicle doors AND holding them open, so they can insert Through-the-Car opening tools without worrying about the door accidentally slamming shut on their tool.

How to sell the HPC Lever Wedge™

Key Selling Points:

- * Other similar tools may spread a vehicle door, but only the HPC Lever Wedge™ holds the door open freeing up both of your hands to finish the unlocking
- * Made of Delrin and will not scratch the vehicle finish
- * Will work on most vehicles with framed windows
- * The HPC Lever Wedge is two tools in one. It is a lever and it is its own wedge, other manufacturers sell two tools to perform the work that the HPC Lever Wedge™ does alone

**Made in
the USA**
