

# Why your customers need the HPC Pocket Cut-Up™

Being able to cut all types of keys is the cornerstone of locksmithing. If a locksmith turns away a potential customer because they cannot cut their key, they force them to go to a competitor, and have lost that customer for life. Tubular locks are becoming even more commonplace. They are found on vending machines, bicycle locks, motorcycles, padlocks as well as many other places. Locksmiths need to be able to cut tubular keys
