

## Checklist for Compliance

Restaurant owners and managers who want to ensure they are complying with the new requirements and providing the safest booster seating options possible for patrons should plan to do the following:

- Work with a trusted partner to determine which booster seats meet the new standard
- Conduct an audit of your current booster inventory to determine your need for compliant products
- Ask manufacturers if they have compliant products

## Make Sure You Register!

It is important that you complete the CPSC's product registration card to improve the effectiveness and response rates of possible recalls. Product registration cards are required to ship with the product and provide the option to register online or by mail.

To help keep your Koala products in good working order, replacement parts are available at: [www.koalabear.com/replacement-parts](http://www.koalabear.com/replacement-parts) or from your preferred distributor.

We Care For Kids.

## Focus on Safety

A new federal standard (ASTM F2640-18) to improve the safety of all booster seats — both in restaurants and at home — was approved by the Consumer Product Safety Commission (CPSC) and will take effect January 2, 2020.

This new standard impacts the foodservice industry. It is critical to know the requirements and where to find compliant booster seats.

*The following are part of the new safety requirements for all boosters:*

1. Adult chair strap

2. Warning labels about usage hazards and adult chair dimensions

3. Product registration to be alerted to possible recalls

4. Labeling requirements about the adult chair dimensions are required on the product packaging and warning label

5. Koala's booster seats are age graded for 36 months up to 5 years of age

6. Boosters are required to be at least 0.8" in width and 0.4" in depth LESS than the adult chair seating surface.

**KOALA KARE** currently offers booster seats that meet the new standard. Highlighted below are some **features and benefits** of our compliant booster seats.

## Booster Buddy

KB116-S (5 Pack)/KB117-S (2 Pack)

- Features dual height options to accommodate a variety of ages and sizes
- Integrated handle for easy carrying
