A side panel mounted full-extension runner for better organised kitchen cupboards and bathroom units

The new pull-out system offered by Richelieu will help you to maximize the use of left-over space with its 150 mm or 300 mm add-on units. This system comes with full extension runners with integrated soft-closing mechanism. Can be used as a sliding system mounted on the door or in a hinged door application just in turning it around. Its clear trays offer a complete view of the stored items and prevent them from falling out.

Product benefits

- Full extension runners
- Integrated Soft-Close mechanism
- Sold complete including 3 clear baskets of 150mm (# 50095110) or 300mm (# 50094110)
- Transparent plastic trays with closed base for clear view of the stored items
- Ideal for the storage spice jars or cosmetics in narrow spaces
- Easy mounting, can be mounted on left or right side
- Can be used with hinged door or mounted on the door with fasteners

Product #	Description	Width	Surface
50095110	Cabinet 3 shelves pull-out 150mm(5 15/16")		Alu grey
50094110	Cabinet 3 shelves pull-out 300mm(11 13/16")		Alu grey

The side panel full extension runner is suitable both for storing items in kitchen wall units and organising cosmetics in bathrooms.

The pull-out system can be used both as a front pull-out or as a pull-out unit fitted behind hinged door

The unbreakable transparent inserts offer an optimal overview of the storage space at all times and the closed base prevents items from falling out.

Picanto comes with a full-extension runner with an integrated soft-closing device. The tubular-framed pull-out is simply fitted to either the right or left-hand side of the lateral panel.
