118

Verrouiller les deux parties du boîtier Using the supplied pin, lock the two parts of the spring mechanism

8

Ajuster la tension des ressorts à l'aide du boulon situé à l'arrière du boîter. Pour obtenir un ajustement idéal, le lit doit rester immobile, peu importe sa position.

La distance entre le cadre de lit et l'armoire doit être de 32-33mm

Spring tension is regulated by ajusting the bolt on the back of the spring.
For proper adjustment, the bed must be able to stop and hold in all positions.
Distance between the bed frame and the cabinet must be 32-33mm
