Reducer

Reference: **DN2000M**

Product description

Thinner for the preparation for use of nitrocellulose, pre-catalysed and post-catalysed varnishes and lacquers.

Physical-chemical characteristics

Density:	0,870 g/cm ³ ± 0.010
Flash point:	13 °C
General properties:	Medium-fast evaporation.

Application systems

Thinner valid for the preparation of use of primers and topcoats. It helps to get a uniform evaporation, a good surface levelling and a final dry film without surface defects.
Valid for spraying and curtain coater applications.

Usage field

Thinner valid for the preparation of use of nitrocellulose, pre-catalysed and post catalysed primers and topcoats, transparent or pigmented, mat or glossy.

Storing and packaging.

Store the container perfectly closed, in a dry place, fresh and well ventilated and keep product away from sun light, heat and ignition focus, electrical sources and incompatible materials.

- Maximum time of stock: stability unlimited as long as the container remains closed.
- Available sizes: 25 litres

Remarks.

Follow the instructions on the package label and take care of precautions for storing and handling, according to those indicated on the Safety Data Sheet.
