

WINDLIGHTS

DECORATIVE LIGHTING

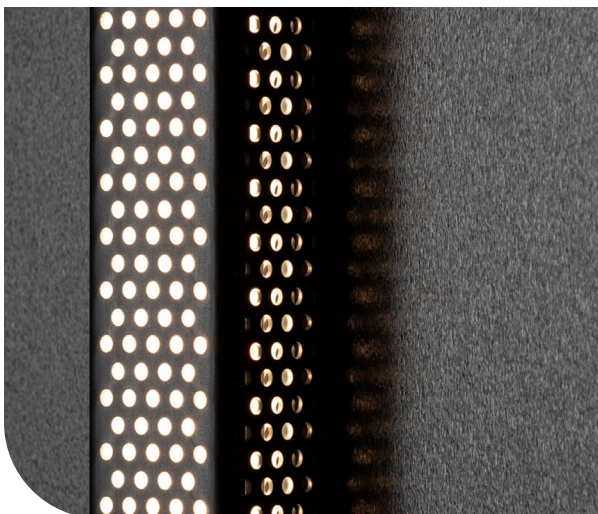

Windlight turns LED lighting into a design feature, beautiful on or off, with mix-and-match options for a custom look.

The Art of Light Diffusion.

Windlight is a refined LED profile system that seamlessly blends beauty and functionality. Featuring a micro-perforated aluminum screen mounted on a recessed, cold-formed profile, it offers a sleek and minimalist aesthetic.

Available in anodized and pre-painted finishes, Windlight enhances any space — whether used for accent lighting, architectural detail, or ambient glow. Discreet when off and striking when lit, it turns LED lighting into a true design element.

BODY
