

PAPER MASKING TAPE

14-DAY UV-RESISTANT

PT14

CHARACTERISTICS

- Suitable for outdoor use and anywhere exposed to the elements, or for covering windows indoors (where the tape will be directly exposed to sunlight).
- Protects and can be used on lacquered or polyurethane-coated surfaces, unfinished wood, wallpaper, or new, unpainted, or freshly painted wall panels.

Blue masking tape made of fine crepe paper with a synthetic pressure-sensitive rubber adhesive specially designed to withstand exposure to sunlight for up to fourteen days. Removes easily and cleanly from most surfaces. Excellent conformability and smooth, soft backing for fingertips, allowing for precise paint lines. **Superior adhesion and clean removal with BLOC•it™ technology.**

APPLICATIONS

- Aircraft Storage
- Building & Construction
- Remediation, Construction, General Painting Applications, Masking Solutions
- Auto Aftermarket, Masking Solutions - Transportation, MRO
- Multi-Purpose Masking, Painting, Protecting & Holding
- Surface Protection
- Moving & Storage
- Outdoor use/protection against ultraviolet rays and UV blocking
