

# DOUBLE PULL-DOWN ROD WITH 360° ROTATION

Turn, store, optimize — the 360° pull-down rod that transforms your closet!

## A revolutionary solution. Full rotation, total accessibility!

With its doubled capacity and easy access through 360° rotation, the double pull-down rod offers a practical and ergonomic solution for your closet. Its tilting structure, when evenly loaded, ensures smooth, fluid rotation even at full capacity, while minimizing effort. Available in two adjustable sizes, it adapts perfectly to different closet widths.

Beyond its performance, the double 360° rotating pull-down rod also stands out for its ease of installation: it can be easily installed in any type of closet using a few screws and is compatible with the System 32.

For added safety and stability, the system features a locking mechanism that secures the rod when fully extended. To return it to the original position, simply press down the blue self-locking levers and push the rod back into the cabinet.

## ADVANTAGES

- Doubled capacity and smooth access to clothes thanks to 360° rotation
- Tilting structure ensuring optimal balance
- Internal regulator compensates for up to 8 3/4 lb (4 kg) load difference between rods
- Locking mechanism holds the rod in the extended position
- Total load capacity up to 53 lb (24 kg) distributed between the two rods
- Durable steel mechanism
- Easy installation, compatible with the System 32

| No.        | Product Width                           | Min. Int. Depth Required | Min. Int Height Required |
|------------|-----------------------------------------|--------------------------|--------------------------|
| 3602230100 | 16 7/8" to 24"<br>(430 to 610 mm)       | 20 1/2" (520 mm)         | 74 3/4" (1,900 mm)       |
| 3603044100 | 24 3/4" to 39 3/4"<br>(630 to 1,010 mm) |                          |                          |
