FALCON®

T Series

Grade 1, cylindrical lock

Overview

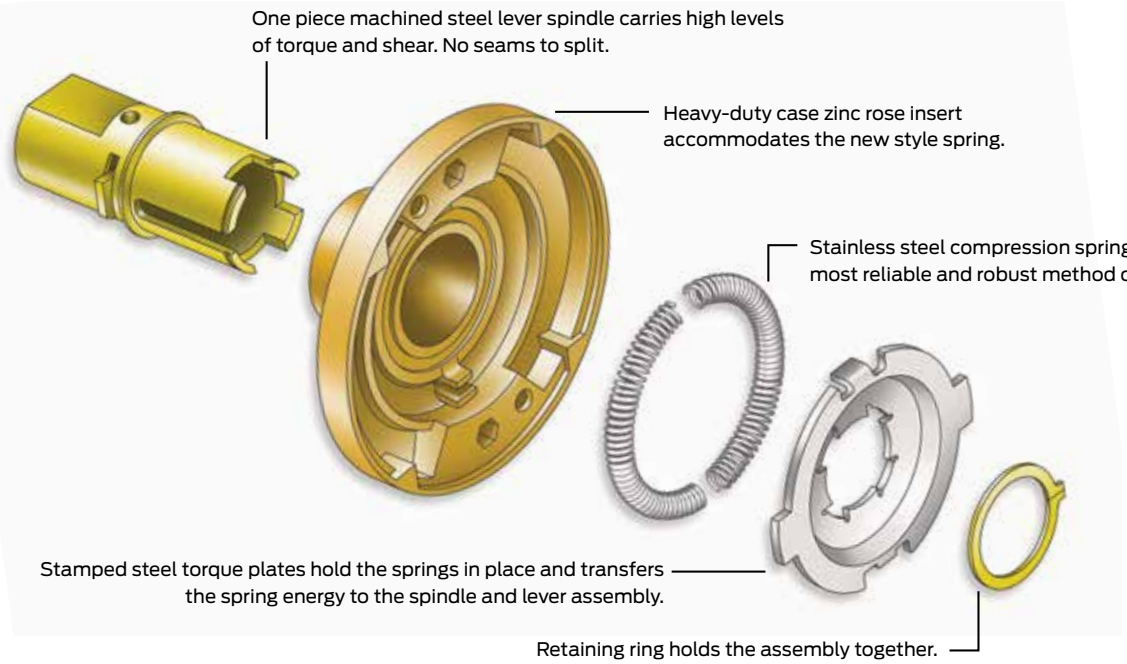

Falcon is focused on offering a solid product and that is why the T Series lock is constructed with a compression spring that far exceeds ANSI/BHMA cycle test requirements. Unlike typical torsion springs that can break at the bend points, the T Series spring provides the most robust lever support for years of reliable performance. Perfect for high-use applications the T Series lock delivers the Falcon promise of providing a solid product with solid performance at a solid price.

Falcon fits - The most versatile lockset in the business

- Fits most competitors' conventional key systems
- Fits all competitors' interchangeable cores
- Pressure Release® lever rotation standard. Prevents damage to internal lock components when subjected to excessive force.
- Ideal for both new construction and retrofit
- Designed for high-use applications such as multi-family, retail, office, institutional and government/military

The most robust lever support

Designed to work hard

T Series levers are available in three designs. Additional options such as abrasive coating and lead lining are available on all T Series levers to cover a variety of application requirements.

Avalon

Dane
