Steel Hawk Electrified Latch

A Whole New Species of Non-Handed Electrified Latch

ADAMS RITE 4300 STEEL HAWK

Adams Rite has reinvented the deadlatch ONCE AGAIN with the non-handed Steel Hawk 4300 – now by far the easiest way to electrify an aluminum entrance door. The amazing new design of the Steel Hawk allows it to adapt to any door swing right out of the box – thanks to its patented two-way *winged* technology.

The Steel Hawk retrofits to 4900, 4500 and 4700 Adams Rite deadlatches using the same strike, and is compatible with existing handles, paddles and levers. Just open the box. Install. Hook up power. That's it. It's so simple, you'll get 'hooked on the hawk' immediately.

In addition to ease of installation, your customers will benefit from the Steel Hawk's adaptability, functionality, and security – hallmarks of Adams Rite products.

Move to the top of the security food chain with the Steel Hawk 4300 by Adams Rite.

ALUMINUM AUTHORITY HARDWARE

Other Key Features:
