A COMPLETE LOCKDOWN STRATEGY BEGINS WITH SIMPLE SOLUTIONS.

40H SERIES VISUAL INDICATORS

The 40H Mortise Lock with visual indicators can secure classroom doors simply, safely, and reliably.

In an emergency, locking classroom doors quickly from the inside is a critical step in protecting children and staff. The BEST 40H Mortise Lock has several visual indicator offerings available, including the visual indicator thumb-turn, the visual indicator laminate, and the keyed cylinder visual indicator option (for use with intruder function),each allowing educators to know at a glance that their door has been correctly secured.

For security directors, facility managers, school board members and administrators, as well as the parents of children in any school community, the 40H visual indicators and its evolving, durable features offer a simple, effective, and practical solution to begin on the path to comprehensive classroom security. These simple, yet significant, indicators available on the 40H can make a big difference when every second counts.

40H SERIES VISUAL INDICATORS

QUICK AND EASY LOCKDOWN SOLUTION YOU CAN TRUST.

VISUAL INDICATOR PRODUCT OPTIONS

Compatible Application
Compatible with trim styles: H, R, J and functions: R, T, AT, AB, TD, C, INL, IND, allowing key access only to change the status of a door.

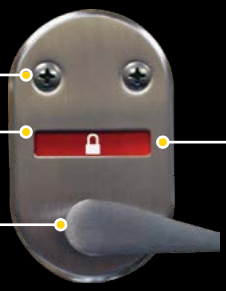

Reduced Binding and Mounting Variation
Screws are at a further radius from spindle hole causing improved strength and less binding risk during installation.

Compatible Application
Indicator is designed to fit largest 'S' Rose split trim. Ideal in thumb-turn functions, such as: AT, B, T, L, LB, LT & AB.

Thumb-Turn Function
Intuitive, clear, and effective thumb-turn allowing users to quickly and easily lockdown the classroom.

Visual Indicator (VIN)

Visual Indicator Thumb-turn (VIT)

Flexible
Visual indicator can be installed on the inside and outside of the classroom.

Visual Indicator
Easy-to-understand locking indicator on inside of classroom, which visually shows if the door is secured or unsecured.

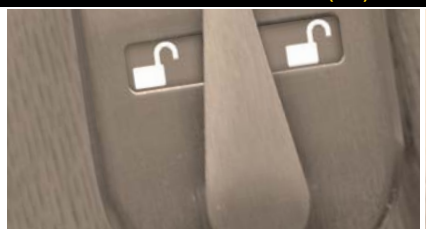

Visual Indicating Laminate

Easy to install
Easily and quickly cut, peel and stick the laminate directly onto the door.

Flexible
Laminate visual indicator works on existing and new door split-trim applications with a standalone thumb-turn.

Increased Cost Savings
Laminate indicator is a cost effective, temporary alternative to provide visual lockdown indication.

When you need a high performance, durable, mechanical lock, the 40H series with visual indicators are the best solution for emergency lockdown situations.

The 40H Series with visual indicators are an ideal security solution for commercial and institutional applications, schools, universities, government institutions, hospitals, and other locations where strength and durability are required in a locking system.

- **Simple to Use** – Color coded locked and unlocked visual indicators ensure that most anyone can lock the door correctly and quickly.
- **Increased Security** – Faculty can lock the door quickly and confidently from the inside of the classroom without going outside the classroom.
- **Easy to Install** – Retrofits to existing 40H mortise lock; for right-handed or left-handed doors.
- **User-Friendly** – Intuitive lockdown icons assist in quickly and easily knowing the classroom is secure from intruders.
- **Flexible** – Compatible with various split trim rose sizes and can be ordered as an option with the lock or as a sold separate kit for retrofit applications.
- **Aesthetically Pleasing** – Available in a wide variety of finishes, including 626, 612, 613, & 605, and can be matched with existing or new hardware.

BEST, Stronger Than Ever.

Since Frank E. Best invented the interchangeable core in 1921, then started Best Lock in 1923, the name BEST has represented tough, innovative, high-quality locks all supported by the highest level of customer support and service. Today BEST is part of the STANLEY family of brands leading the industry with bold, proven designs and smart solutions for your business and your customers.
