ELECTRIC STRIKES

RIM EXIT & UNIVERSAL CYLINDRICAL STRIKES FOR ACCESS CONTROL

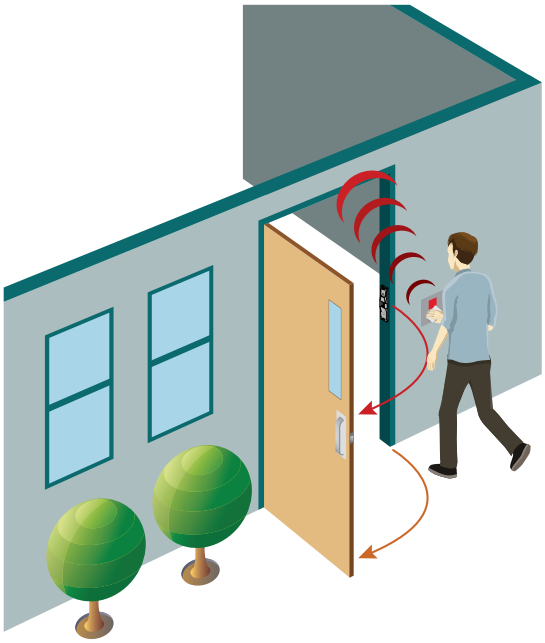

RIM EXIT STRIKE

UNIVERSAL CYLINDRICAL STRIKE

PRIMARY APPLICATIONS

DESCRIPTION

BEA's Electric Strike portfolio includes Rim Exit and Universal Cylindrical strikes for access control applications.

The Rim Exit strike is designed specifically for rim exit devices. This strike is completely surface mounted, which eliminates the need to cut into the door frame. The Rim Exit strike has a three-hour fire rating and has been independently tested for over four million cycles of operation.

The Universal Cylindrical strike provides controlled access and security for egress and ingress applications where code compliance and safety are paramount. This strike has been independently tested for over one million cycles of operation.

FEATURES & BENEFITS

- UL / ULC listed for up to 1500 lbs of static strength
- Conventional keeper design promotes even-load distribution in the event of a forced entry
- Reinforced housing reduces twisting on imperfect frames
- Brushed stainless steel (US32D) provides a complementary finish to existing door hardware
