AC Series | Access Control System

AIPHONE

NEW

Premium Access Control Solution Backed by the Guarantee You Trust

Superior Quality | Award-Winning Service | Unrivaled Support

Top Reasons to Select Our Access Control System

Get the benefits of having a single security solution provider

With our Aiphone promise, you are assured of getting the quality and support you have come to expect from our brand.

We are your go-to point of contact for all intercom and access control projects, delivering timely results with efficiency.

Our incredibly responsive team is here to answer your questions and assist with configurations to help guarantee a smoother installation.

Save time and avoid having to determine cross-product compatibility or product availability from one manufacturer to the next; we take out the guesswork.

Comply with building codes and regulations *without* investigating

All AC Series components are proudly manufactured in a favored nation, ideal for sensitive or sanctioned project demands.

Being NDAA and TAA compliant–and soon to be on the GSA Schedule–ensures this product line conforms to government safety standards.

Having UL certification from the leader in product safety testing makes it easier to meet local building code requirements.

Combine with any Aiphone entry security intercom system

Whether a system is new, old, analog, or IP, the AC Series will pair with all intercom technologies.

Integrates with the most on-demand security features, providing controlled access with visitor screening, internal communication, and video monitoring.

Easily retrofit existing systems with the same quality pledge as our intercoms.

Start small or large, grow anytime

With compact over-the-door controllers and traditional access control panels, we can outfit a system to meet any size or configuration.

Extremely flexible system can be expanded with simple hardware.

Customize with simple, sophisticated software

User-friendly software provides simple programming for complex scripts, allowing for virtually an unlimited number of triggered events in a single system.

With an intuitive interface, the software is used to control everyday functionality and maintenance, helping to deploy any changes promptly.

Save with remote system management

Changes can be deployed anywhere there is a network connection, saving time not having to be physically onsite to make updates.

Dealers no longer need to roll their company trucks to site locations for system updates, saving on company resources and fuel.

Updates can be done anywhere there is a network connection
