7KC Series Cylindrical Locks

Long-lasting durability for standard-duty applications.

BEST's 7KC standard-duty cylindrical lock combines quality and performance in a reliable solution for a wide range of applications. With strength exceeding ANSI Grade 2 requirements, and features designed to resist attacks, promote product life, and match current architectural trends, the 7KC series delivers exceptional results for moderate traffic points.

Dependable security that's easy to use.

BEST 7KC locks are not only designed to last and protect, they're also simple to install, retrofit, rekey, and use. Premium workmanship and carefully designed components ensure that 7KC locks perform—easily but reliably—over the long-term.

606: Satin Brass

612: Satin Bronze

613: Oil-rubbed Bronze

625: Bright Chrome

626: Satin Chrome

Features

BEST 7KC

- **Reliable strength.** The BEST 7KC series exceeds ANSI Grade 2 requirements. Design features like through-bolt mounting studs provide strength and increased torque resistance for reliable long-term performance.
- **Dependable durability.** We designed the 7KC lock series for long product life in standard traffic applications, including features like a robust hub and torsion springs for extra resistance to lever sag. All 7KC internal components are treated for corrosion resistance, which ensures a longer, more reliable performance life.
- **Secure design.** Security is built-in to the 7KC, with features like requiring core removal before keyed levers may be removed, a snap-on inside rose concealing mounting screws and no exposed keeper holes on keyed levers.
- **Easy installation and retrofit.** Each 7KC lock is pre-assembled, and its cylindrical chassis fits common door preparation, making installation quick and easy. Retrofit and rekeying are also simple, thanks to compatibility with conventional key-in-knob cylinders. BEST interchangeable cores allow for easy rekeying without removing the levers.

BEST 7KC locks provide exceptional quality, security, and reliability for standard-grade applications.
