Features

BEST 8K

- **Heavy-duty performance.** With solid construction and high-quality materials, BEST 8K locks are built for durability and security in the most high traffic applications. Heavy knobs machined from brass or bronze bar stock offer long-lasting performance and a heavy-duty deadlocking latch with 9/16" throw provides greater strike engagement.
- **High-security features.** Designed for greater security, the BEST 8K series includes features like no keeper holes on keyed knobs, breakaway options to prevent wrench attacks, and spin-free knobs requiring keys for operation. The BEST 8K keyed knob is removable only after the core is removed, resulting in higher security.
- **Proven reliability.** Built-in features like a friction insert inside the rose to resist loosening and long bearing length in the chassis for smooth, wear-resistant operation keep the 8K working smoothly year after year.
- **Easy to use.** The BEST 8K series allows quick, economical rekeying and is simple to operate even in demanding applications. A rotating knob face provides easy hand of door change without removing the knob, a built-in steel retractor with low friction bearings allows smooth, wear-resistant operation. An optional tactile/knurled knob can be used for blind, safety, or accessibility applications.

BEST 8K knob sets deliver heavy-duty performance you can trust.
