SPSL Stanley Patient Safety Lever

Health, security, and safety for secured behavioral wards.

BEST's Stanley Patient Safety Lever (SPSL) locksets meet the unique challenges of healthcare applications with utmost quality, high flexibility, and industry-driven innovation. Designed in collaboration with healthcare industry experts and service providers, the SPSL Series ensures patient safety with ADA-compliant ligature-resistant features. Heavy-duty construction and premium performance combined with non-institutional aesthetics promote a healing environment that is also fully secure.

A safer healing environment.

We designed our SPSL locksets with patient safety in mind. Each SPSL Series device includes a patented free-moving, tapered, bi-directional lever that fits flush against a low profile, conical escutcheon—combining patient safety and security. These ADA-compliant ligature-resistant locks lead the industry in tailored features for secured healthcare applications.

SPSL Specifications

Certifications	ANSI A117.1 section 404.2.6 Accessibility Code (ADA compliant)
Product Specifications	Mortise Product Specifications: Materials: stainless steel Door thickness: 1 3/4" Cylindrical Product Specifications: Materials: stainless steel Door thickness: 1 3/4" Backset: 2 3/4" or 5"
Keying	7-pin SFIC
Lock Functions*	Mortise Lock Functions: Single-keyed Classroom – R Storeroom – D Bedroom privacy – RF Bedroom privacy – LTF Office institutional privacy – A Dormitory deadbolt – T Double-keyed Intruder latch – INL Intruder deadbolt – IND Intruder storeroom deadbolt – IND2 Keyless Passage – ON Bathroom privacy – LT Asylum – no free egress Asylum lever/lever – W1 Asylum double cylinder/lever – W2 Asylum deadbolt lever/lever – W3 Asylum deadbolt double cylinder lever/lever – W4 Asylum lever/blank – W10 Asylum double cylinder lever/blank – W20 Asylum deadbolt lever/blank – W30 Asylum deadbolt double cylinder lever/blank – W40 Cylindrical Lock Keyless Functions Tubular passage – ON Cylindrical passage blank interior – ONX **Actual operation may differ from industry standard functions. Please refer to catalog for details. Cylinders must be ordered separately*
All Finishes	630: Satin Stainless Steel
Warranties	Three-year mechanical Three-year finish

630: Satin Stainless Steel

Features

BEST SPSL

- **Superior performance.** BEST's SPSL locksets lead the industry in quality and performance with tighter tolerances and non-moving, low profile escutcheons.
- **Ligature-resistant.** Our patented design includes independent, tapered, free-moving, bi-directional levers set flush against low profile, conical escutcheons.
- **Heavy-duty security.** The SPSL Series incorporates a thru-bolted trim design for greater strength and security.
- **Proven durability.** The SPSL Series is designed with fewer moving parts to promote greater durability. Solid stainless steel construction makes the escutcheon and lever long-lasting. Design features like independent lever springs and internal stops reduce everyday wear and tear on the device.
- **Application-driven innovation.** Designed to meet the unique needs of a secured behavioral ward, SPSL locksets combine non-institutional aesthetics with patented ligature-resistant features and maximum flexibility.

BEST's SPSL Series delivers ADA compliance and ligature-resistant safety features in an easy-to-use aesthetic for secure healing environments.
