The Command Access CL180 LE series is a low-energy, cost effective cylindrical lock that is ideal for any continuous duty application or condition requiring low surge and hold current. Its unique electronics allow the CL180LE to function much like a motor-driven lockset without the potental problems inherent in motors. The CL180LE will operate with an input voltage between 11-30 volts, eliminating the need to inventory 12 and 24V models. The CL180LE features a standard Built-in Request to exit (REX/AE) switch.
