GT-1C7

7" Video Tenant Station

DESCRIPTION

The GT-1C7 is an audio/video tenant station for the GT Series Multi-Tenant Video Intercom system. It is equipped with door release and talk buttons. In addition, the station has a concierge/security guard call button and an option button to control external devices, such as lights. The station also has PanTilt and Zoom control, as well as a light adjustment button for the PTZ camera at the entry.

When a visitor calls, the tenant station rings and video is displayed on the screen. The call is answered by pushing the talk button. The GT-1C7 has the capability of calling the Concierge/Security Guard station(s), turning on an external light while speaking with a visitor at the entrance, and receiving an emergency tone from a pull cord or panic call button. The GT-1C7 has a slim, streamlined design and can be surface mounted. Only one GT-1C7 video station can be used per tenant.

Communication is hands-free at the entrance station when a tenant answers the call. While speaking with the visitor, the GT-1C7 can communicate with either hands-free (VOX) or push-to-talk (PTT) functionality.
