GT-1M3

3.5" Video Tenant Station

DESCRIPTION

The GT-1M3 is an audio/video tenant station for the GT Series Multi-Tenant Video Intercom system. It is equipped with door release and talk buttons. In addition, the station has a concierge/security guard call button and an option button to control external devices, such as lights. The unit also has zoom and a light adjustment button for the camera at the entry. When a visitor calls, the tenant station rings and video is displayed on screen. The call is answered by pushing the talk button. The GT-1M3 has the capability of calling the Concierge/Security Guard station(s), turning on an external light while speaking with a visitor at the entrance, and receiving an emergency tone from a pull cord or panic call button.

The GT-1M3 has a slim, streamlined design and can be surface mounted. Two units can be used in the same tenant location. Communication between tenant stations is not possible.

Communication is hands-free at the entrance station when a tenant answers the call. While speaking with the visitor, the GT-1M3 can communicate with either hands-free (VOX) or push-to-talk (PTT) functionality.
