Electrical (continuous duty)

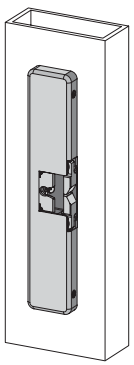

- .45 Amps @ 12VDC
- .25 Amps @ 24VDC
- PoE friendly

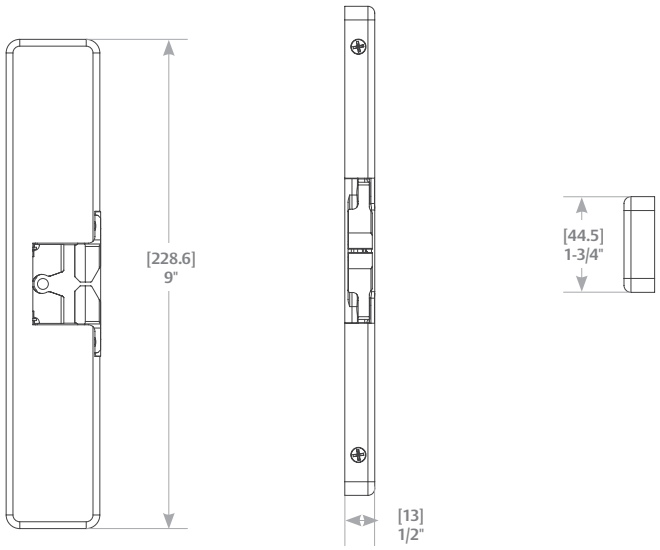

The 9400 series is a slim-line, surface mounted electric strike designed to accommodate rim exit devices with a 1/2" throw latchbolt. All components are completely encased within its 1/2" thick stainless steel housing, so no cutting on the frame is required for installation. Simply place the electric strike on the surface of the frame, align it with the exit latchbolt, and install.

An 1/8" spacer plate is provided to accommodate varying door gaps. The 9400 exceeds Grade-1 standards for strength and performance. It is field selectable for fail secure and fail safe operation, and for 12 or 24VDC. The 9400 features a smooth cover to conceal the mounting screws and provide a sleek surface for superior looks.

Spacer Plate Included

The 9400 ships with one 1/8" spacer plate included in the box. Units ordered in a 630 finish are stainless steel. All other finishes have a black stainless steel spacer. Additional black spacer plates can be ordered as an accessory.
