Technology Upgrade – A Trade-in Program

Upgrade & Update Your Customer's Existing Access Control System and SAVE!

If your customer's current access control system is failing to meet their security/business needs, has maintenance and performance issues, reached its end of life, or has features that do not support mobile applications, then it's time for an upgrade.

Receive leading-edge features and an additional savings when you upgrade their existing access control system with Kantech EntraPass - backed by 30 years of innovation, integrity and exceptional user experience. Kantech EntraPass provides premium security capabilities including the ability to monitor their security, and view video footage and intrusion alarms on the go with the EntraPass Go mobile app, all at an affordable price.

Special Offer Includes:

- Removal of their current system and replacement with a Kantech system (EntraPass software and KT-400, KT-1 door controllers and ioSmart smart card readers)
- In most cases, re-use of existing cabling and door hardware
- No need to reissue cards! Import their existing user database and reuse existing cards making the upgrade seamless, with minimal down-time and cost. Kantech will test to verify compatibility.

EntraPass On The Go

Give your customer the ability to access their system remotely with EntraPass Go mobile app. Show them that they can even view video and lock/unlock doors remotely, saving valuable time. iOS and Android compatible.

Investment Protection

Kantech technologies are engineered with the goal of keeping your customers system moving forward and money in your pocket. Backward compatibility is one of our key strengths. Door controllers from 30 years ago are still compatible with current EntraPass software providing peace of mind that EntraPass will continue to be supported for years to come.

Loaded with Features for Exceptional User Experience

- Email Notifications – Receive emails from the system based on what you want to know and when.
- Photo ID Badging – create sophisticated badges customized for your particular application.
- Unsurpassed Video and Intrusion Integration – EntraPass, Exacq video and DSC intrusion technologies are integrated for one simplified security experience.
- Microsoft Active Directory Support – Manage EntraPass operators using Microsoft Active Directory with a synch feature to eliminate the manual creation and maintenance of Active Directory users.
- Web Client Access – access your access control, video and intrusion information from anywhere, anytime using the Web.
- Ease of Use – Kantech offers innovative and technologically progressive solutions that are easy to deploy, configure and manage, leaving you free to tackle other important issues.

Grow as Your Customer's Company Grows

Our system grows as their company grows with exceptional access control, video and intrusion scalability capabilities for a complete security solution.
