4040XP feature enhancements

Coming soon to the LCN 4040XP are several design features that make installation and adjustment of the 4040XP easier and more intuitive.

Key Points

- **Performance:** Performance remains the same, there are no changes to the internal components
- **Expected Launch:** July 2022
- **Part Numbers:** Part numbers remain the same
- **Pricing:** No price adder for the new design
- **Packaging/ Labels:** Boxes with the new design will be labeled with a green dot located near the box label

The table below outlines every enhancement and how it will benefit the user.

Enhancement	What is Changing	Benefits
Patent-pending cover retention 	Redesigned snap-fit cover with patent-pending retention fit	Improves retention fit and protects the product
Patent-pending positive stop regulation valve 	Addition of positive stop on all regulation valves (latch, main speed and back check) to prevent screw from being backed out	Eliminates leaking closers from unintentional mis-adjustment

Patent-pending regulation valve indicator 	Addition of color to regulation valve screw—providing a colored warning of a stopping point in the staking process	Provides visual to prevent backing out screw, which can cause leakage Highlights the position of the screw with an enhanced visual marker
Graphics/digital 	Addition of LCN logo Labeling of regulation valves on casting QR code that links to digital and interactive resources, including adjustment instructions, component descriptions, mounting options and a toll-free number for tech support	Quickly identifies the manufacturer/brand Offers on-the-spot, self-service support, making installation and adjustment easier
Casting design 	Updated casting shape LCN logo added	Visually differentiates from look-alike competitor versions
Green Dial 	Updated mechanical operation – fewer components Improved UI messaging to reduce improper adjustment	Provides intuitive graphical updates to aid in adjustment
