Introduction

How to Use the LCN Parts Manual

The LCN Parts Manual is designed to help technical service or maintenance personnel correctly identify parts that may be required to return an LCN closer to service.

Parts Manual Organization

The LCN Parts Manual identifies replacement parts that are available through many LCN distributors. The manual sections are organized by product type and series. The products within each section are listed in numerical order. Major components, such as cylinder assemblies and track assemblies, are listed within each individual closer series. A complete component assembly often has individual replacement parts available.

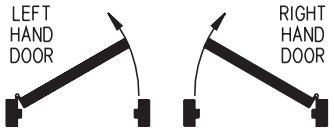

Casting (Forging) Numbers

Many LCN parts or components have casting or forging numbers stamped or raised on the surface. An example would be the "71" or "320G" on an LCN cylinder assembly. These numbers really do not identify a particular part or component. You should follow the "How to Order" page in the latest edition of the LCN catalog, or call LCN Customer Service for assistance.

Additional Information

In addition to the closer series, suffix number, and short description, many parts and components require more information. Items that require more information have letters listed to the right of the description. The letter(s) are defined as follows:

- F – Finish: Indicate the powder coat or plated finish desired. Not all parts and components are available with a plated finish. Refer to either the latest edition of the LCN catalog or the current LCN Price Book for a standard powder coat finish chart and available plated finish designations.
- S – Size: Refers to the spring power of the closer; the larger the number, the more power the closer may have to close a door. Several closer series have an adjustable "Size 1" available. In many cases, a "Size 1" closer will meet low opening force requirements. Some "Size 1" closers are not adjustable. Please refer to the latest edition of the LCN Catalog for clarification on individual closer spring power.
- H – Hand: Please specify either RH (Right Hand) or LH (Left Hand). The hand of a door can be determined several ways. The diagram below may be used as a reference.

- V – Voltage: Some parts and components require voltage. Please specify either 24V or 120V.

Part and Component Pricing

Prices for parts and components listed with the LCN Illustrated Parts List can be found in the current LCN Price Book. The Price Book contains basic ordering and product information.

How to Order

1. Identify the series of closer being serviced: 4110, 4040XP, 1460, etc.
2. Refer to the page(s) illustrating the service parts available for the specific closer and select the part required by using the closer series and the suffix.
3. Check to the right of the part description. If additional information is required, please provided it.
4. Order the parts required using the closer series, suffix number, finish, size, hand, and/or voltage.

Part or Component Identification

If the part you require is not shown in the LCN Illustrated Parts List, it may be obsolete. Contact your distributor, your local Allegion consultants office, or LCN customer service at 1-877-671-7011.

Ordering Examples

Here are a few examples of what an item may look like as it is ordered. Please refer to the "How to Order" page at the end of each individual closer series within the LCN Catalog.

Additional Assistance

If any additional assistance is needed, call LCN at 1-877-671-7011. Our Customer Service or Technical Support team will do their very best to offer door control solutions on any of the products listed within the LCN Parts Manual.

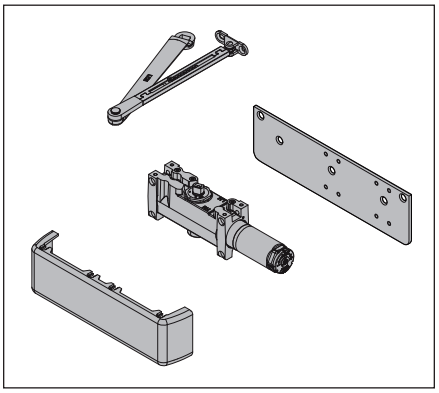

Please Note

Every effort has been made to ensure the accuracy of the LCN Parts Manual. If an error does exist, please contact LCN Customer Service. Errors and omissions will be incorporated into the document's next edition. Illustrations are designed to show general shape and size of a part and the relationship that part has to other parts. Actual size and shape of parts or components may differ or vary from the actual part or component that is shipped. LCN offers this information as a reference only. All information is subject to change without notice from LCN. If any additional information is needed, please call LCN Customer Service or Technical Support at 1-877-671-7011.
