Specialty sensor and buzzer switches

TBR-100

CSW-200

Timer-buzzer rectifier

The TBR is a multi-functional device made to serve as an added layer of security or convenience for your access control system. The TBR offers a delay timer, buzzer and AC to DC rectifier all in one package.

EMS Series

This versatile sensor can be surface mounted above any door, ceiling or wall for request to exit applications. The EMS Series, Passive Infrared (PIR) Sensor, has the flexibility and low profile design to make it an effective sensor for managing building security and traffic flow.

CSW Series

The CSW Series of switches were designed for a concealed desk application. They are used to release an electric lock or device from a remote location. The CSW Series currently operates via momentary action toggle switches that can be surface mounted.

WRT-K

Wireless release kit (1 receiver, 2 transmitters)

The 900MHz receiver and transmitters allow wireless activation of electronic access-controlled doors. With two outputs, several doors can be controlled at the same time or with slight delay.

Power supplies

LP Series

150 and 250 models

LP150, LP250

The LP Series of power supplies include a 1.5 amp and 2.5 amp option to power various electronic access control devices and most single or double door applications. This line of UL294 certified, Class 2 power supplies have field selectable output voltage, a built-in charger for battery backup and the ability for fire alarm integration. Field replacement is simple with an industry common power supply board footprint and power can be easily managed with the addition of the RDB4 option board.

Certifications include:
- UL294, UL603, Class 2, FCC Part 15, CSFM, RoHS and CSA-C22.2 NO.205

Accessories
- RDB4 Option Board is a four output relay distribution board (LP250 only - sold separately)
- LP150B 1.5 AMP board only
- LP250B 2.5 AMP board only
