PEAKS®

Patented Keying Solution

by BEST

Security. True Control. Convenience.

BEST Peaks®

Advanced Key Control

For advanced solutions in key control and security, BEST offers Peaks®, the most adaptable and cost-effective patented keying system on the market. The patented mechanism ensures that cylinders and cores will only operate with the Peaks® keys, which are only available through authorized BEST distributors.

150 Series

For traditional BEST Interchangeable core applications, the 150 series offers the security and convenience of a patented solution that will operate a wide variety of locking hardware, including cylindrical locks, padlocks, deadbolts, and cabinet locks. The 150 series is available in 6 or 7 pin sizes, and utilizes the same service equipment as standard BEST cores. Because the patented pins are factory installed, the Peaks® cores use the same combinating procedures as the standard BEST cores.

7 Pin Core & Key

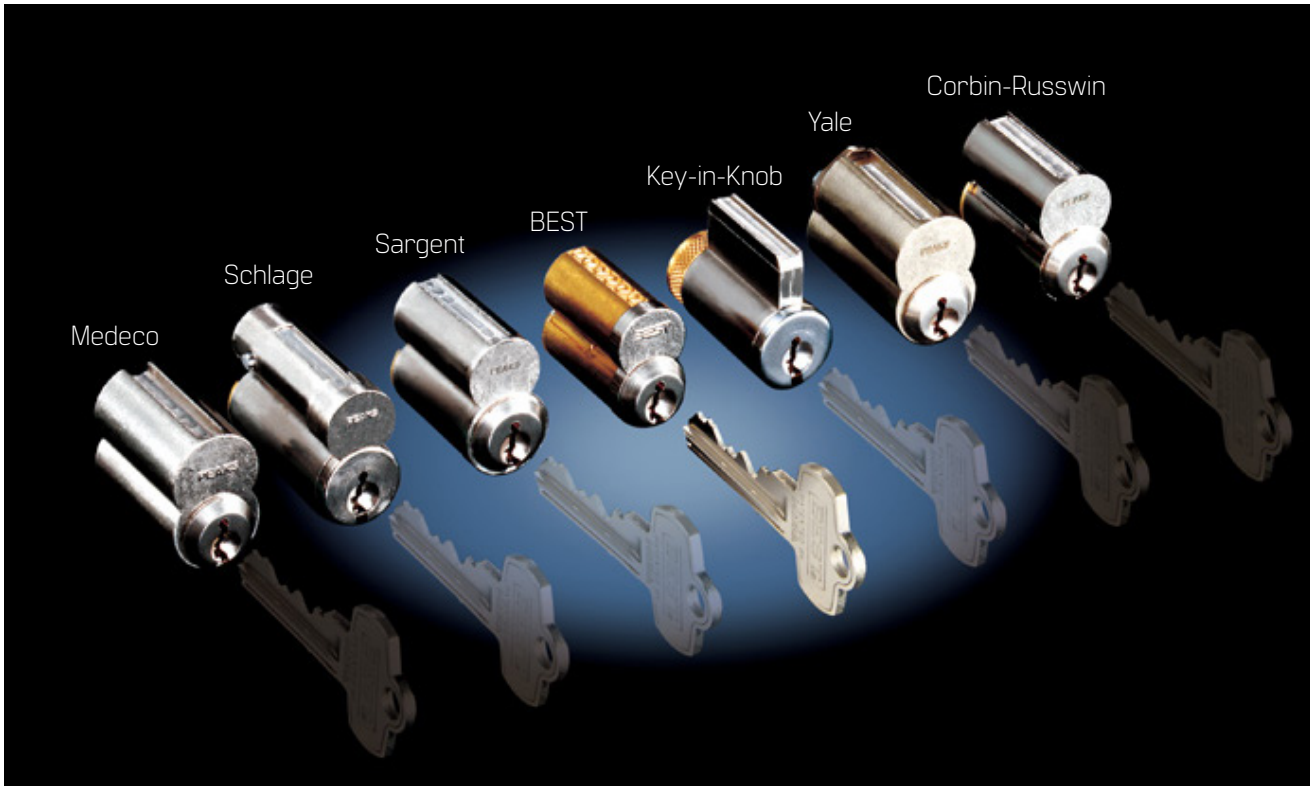

6 Pin Core & Key

140 Series

Peaks® can also be used to secure facilities utilizing other manufacturer's hardware. The 140 series offers 6 pin configurations that will adapt to the following housings: BEST interchangeable core, conventional key-in-knob cylinders, and removable cores for Corbin-Russwin, Medeco, Sargent, Schlage, and Yale. All cylinders can be keyed into the same sys-tem, providing you the ability to operate all the locks at your facility using a single key, regard-less of the lock manufacturer.

All Peaks® key systems:

- Are available in multi-milled keyways for large systems
- Can utilize either the A2 or A4 keying systems.
- Are supplied with free keying schematic, system consultation and code sheets.
- Are protected by a 3 year warranty - our promise of product quality
- Use thick keys for increased blade strength

Guaranteed Quality

Best has been designing and manufacturing locking hardware for over 75 years. Our responsibility has always been to ensure a user-friendly product design that meets your needs. Standing behind this promise to you, our standard three year warranty applies to ALL products that we provide.

A Complete Access Control Provider

An effective "access control system" is more than top quality hardware. It involves surveying a facility for a needs assessment, planning a logical strategy for building access, designing customized solutions, writing appropriate specifications, properly installing products, training staff and employees, auditing and evaluating effectiveness, and making appropriate system upgrades as technologies evolve. All of these are elements in a security equation that lead to long-term and effective access control.

At BEST we are dedicated to providing access control for the life of your facility. For over 75 years, we have committed to providing solutions through top quality products as well as excellent client services. Our services involve:

- Consultation and assistance with security design and administration
- Full facility survey and evaluation to determine exact product requirements
- System design for mechanical and electronic access control
- Specification writing services through BEST's own SpecCentre®
- Complete installation services from door preparation to electronic programming
- Ongoing services and upgradeable product designs for hassle-free growth and alteration of your system
- Masterkey code storage and maintenance for the life of your system
- 24-hour service and assistance availability for emergency needs
- Complete service manuals, video's, training and product support materials

For questions about ordering and to be sure you get the right configuration for your needs, contact your BEST dormakaba sales representative.
