SCHLAGE

Everest 29™ SL

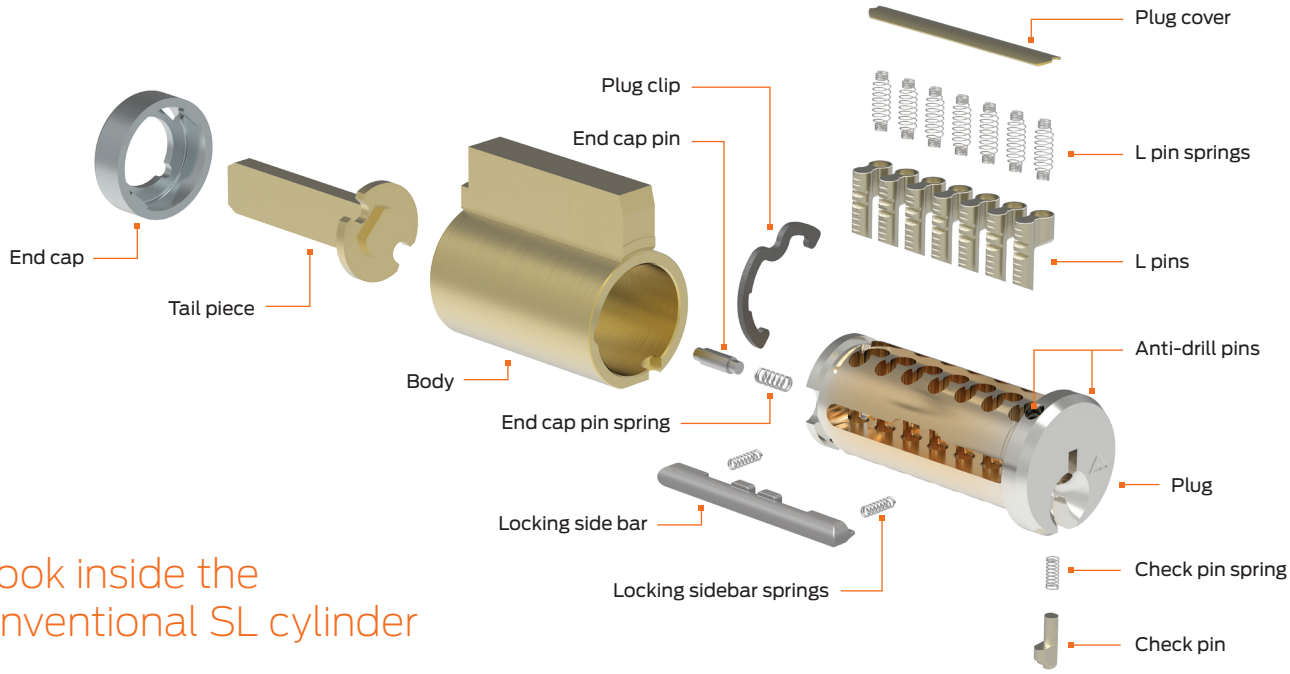

7-pin full size cylinders

Everest 29™ SL cylinders provide users capabilities never before offered by Schlage. An SL cylinder accepts a Small Format Interchangeable Core (SFIC) A2 key system in a full size Conventional key-in-lever (KIL) or a Full Size Interchangeable Core (FSIC) cylinder format. Buildings on multiple key systems can now be brought into the same restricted key system at a much lower cost than replacing installed lock hardware.[1]

1 SL cylinders are available to fit any mechanical Schlage lockset or deadbolt utilizing Schlage Conventional or FSIC cylinders. Fits electronic ND and L Series locksets along with many competitive manufacturer's lock products.

A look inside the Conventional SL cylinder

Benefits

- Allows one Everest 29 R key system to span three unique cylinder formats: Conventional, FSIC, and SFIC.
- 7-pin design offers four times more keying combinations in a master key system than 6-pin cylinders
- Enables Primus XP exclusivity and physical security features to be introduced into an SFIC based facility
- Locking side bar mechanism improves pick and bump resistance
- Key duplication on standard (basic) key cutting equipment
- SL cylinders fit all Schlage and Falcon® cylindrical locks
- Backward compatible to Everest B keyway families
- Fits an extensive list of competitor's locks

Additional security gained with Primus® XP
