672 Series

TouchBar

Overview

The 672 TouchBar is a request-to-exit device which releases electronic locking devices, most commonly electromagnetic locks when the bar is depressed. The “PUSH TO EXIT” signage provides an obvious exit indication for building occupants and the simplified design allows for reversing the signage in the field. The new pivoting bar design allows 1/4" activation and the 2 1/4" low profile provides ample clearance through the door - notably less than others in the industry.

The 672 TouchBar request-to-exit device is easy to install and simple to wire. The device’s rugged cast ramped end caps deflect blows and provide extra durability.

- 1/4" Movement activates immediate release
- Standard Double Pole, Double Throw switch utilized
