GETTING STARTED

INTRODUCTION

The ***PHI Precision Apex 2000 Series Touchbar Style Exit Device*** is highly regarded by architects and end-users alike. Many of the nation's largest health care and educational facilities prefer the Apex for its aesthetic design and efficient engineering. All Apex 2000 Series Exit Devices are UL listed for panic and fire hardware and are certified to ANSI A156.3 Grade 1. Several models are also certified for hurricane resistant applications. A complete offering of mechanical and electrical options provide a wide range of exit device security solutions. However, the traditional core strengths of the product can't be overstated — simple operation with few moving parts, manufactured with true ANSI/BHMA architectural finishes. The Active Case is constructed from investment cast steel and the universal mounting holes provide an easier retrofit installation.

OVERVIEW

Before looking up the part

Before looking up the part, know the **model** of the exit device, the **function** it performs, which **style** lever, knob, or grip you presently have, and what type of **finish** is on it. All these parameters are important to ordering the proper parts for your device.

Please read any footnotes, as they may contain important information concerning options for your unit or your parts.

Models

2100 Rim Devices

2200 Surface Vertical Rod Exit Devices

2300 Mortise Exit Devices

2400 Narrow Stile Rim Exit Devices

2600 Narrow Stile Concealed Vertical Rod Exit Devices

2700 Wood Door Concealed Vertical Rod Exit Devices

2800 Concealed Vertical Rod Exit Devices

Functions

Rim and Vertical Rod Exit Devices incorporate universal function.

ANSI Function	Description
01	Exit only (cover plate)
02	Dummy trim
03	Key retracts latchbolt
05	Key locks/unlocks thumbpiece
08	Key locks/unlocks lever/knob
10	Double cylinder - inside key locks/unlocks lever/knob
14	No cylinder - lever/knob always active
15	No cylinder - thumbpiece always active

Style

- Know which of the many styles of trim and levers your unit requires.
- Know which options your unit has.
- Know if your unit has a special rating such as Fire, Hurricane Compliance, or Delayed Egress that would require special ordering of the parts.

EXIT DEVICE OVERVIEW

This chapter provides top level diagrams for various Apex 2000 models of Exit Devices. It gives direction as to where in this manual more detailed information on the separate components of that model may be found.

The diagrams show a basic model. Details of usage and options are listed in the component chapters. If you do not find the optional or specialized part, see Chapter 8, *Other Components*.

OTHER COMPONENTS

This chapter covers power supplies, conversion kits, and miscellaneous hardware that may not be covered in other chapters.

POWER SUPPLIES

Power Supply

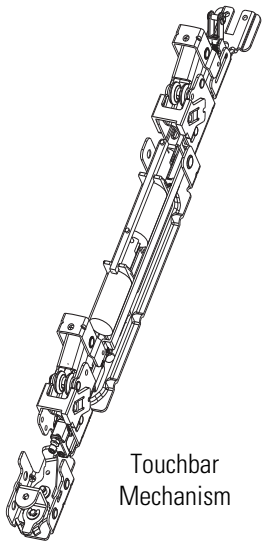

Control Module

Use these parts to order replacements to your electrical Exit Device or to upgrade from a mechanical to an electrical Exit Device. They are used with the Electrical Conversion Kits listed below.

Number	Description
	Power Supply Units
02318-06	ELR150 Power Supply – no devices

GLOSSARY

ALK Exit alarm, battery operated.

ALW Exit alarm, remote powered.

Armored front The mortise lock front and faceplate designed to prevent tampering with the cylinder clamp screw and case mounting screws.

Backset The distance from the faceplate to the center of the cylinder or lever.

BRL Braile touchbar.

Cam See *Cylinder cam.*

Core See *Interchangeable core.*

Cylinder See *Mortise cylinder.*

Cylinder cam A rotating part of a keyed cylinder that drives the deadbolt or latchbolt.

CD Cylinder dogging.

Cylinder ring A metal ring that fits around the cylinder and protects it from tampering. The cylinder ring also spaces the cylinder out to the right position.

CVR Concealed vertical rod.

DE Delayed egress.

Door bevel The angle on the edge of a door.

Door status sensor A sensor that monitors whether the door is open or closed. This sensor is used to detect a forced entry, or a door that is propped open.

DS Door position monitoring switch.

E Electric device.

ELR Electric latch retraction.

Escutcheon A surface-mounted plate that covers holes that were made in the door for levers and cylinders.

Faceplate A finished part of a mortise lock that covers the armored front. See *Armored front.*

Figure-8 The basic shape of the interchangeable core and its housing (door lever, cylinder, padlock, and so forth.). See also *Interchangeable core*.

FL Fire exit hardware.

Hand of door The swing direction of the door as viewed from the outside of the door. A right-handed (RH) door is hinged on the right and swings inward. A left-handed (LH) door is hinged on the left and swings inward. If either of these doors swings outward, it becomes a right-hand reverse bevel (RHRB) door, or a left-hand reverse bevel (LHRB) door respectively.

HC Windstorm and hurricane code device.

Interchangeable core A figure-8 shaped device that contains all mechanical parts for a masterkeyed system. The interchangeable core can be removed by a special control key and can be recombinated without disassembling the lock. See also *Figure-8.*

Key override An optional feature that enables an authorized user (in an emergency) to bypass all electronic locking features, and open the lock with a mechanical key.

Latch status sensor A sensor that monitors whether the latchbolt is extended or retracted. This sensor can be used in combination with the door status sensor to determine whether the door is fully secure. See also *LD/LDS.*

LD Less dogging.

LDS Latchbolt monitoring double switch.

Lock function An ANSI code number describing the way a lock operates.

LS Latchbolt monitoring switch.

Mortise cylinder A threaded lock cylinder that screws directly into the lock case. A key-driven rotating cam, attached to the back, drives the locking mechanism.

Mortise A rectangular cavity cut into the edge of a door. Also can mean the act of making such a cavity.

Mortise lock A lock that fits into a mortise. Other locks fit into bored holes or mount to a surface. See also *Mortise.*

Q Wireless access management system.

Removable core See *Interchangeable core.*

Request-to-exit switch A switch that allows the user to exit without setting off an alarm. When wired to an alarm system, a TD or TDS switch sends a signal to disable or sound an alarm, start a timer, and so forth.

SEC Security screws.

SNB Sex nuts and bolts.

SVR Surface vertical rod.

Tailpiece A part that extends from the back of the cylinder and engages an exit device mechanism.

TDS Touchbar monitoring double switch. See also *Request-to-exit switch.*

Template A precise, detailed hole pattern that serves as a guide for the mortising and drilling of doors and frames.

TS Touchbar monitoring switch. See also *Request-to-exit switch.*

Wire harness A group of wires bundled together with connectors at either end.

WALW Weatherized exit alarm, remote powered.

WTDS Weatherize touchbar monitoring double switch. See also *Request-to-exit switch.*

WTS Weatherize touchbar monitoring switch. See also *Request-to-exit switch.*
