INTRODUCES 7000 SERIES EXIT DEVICES WITH IMPROVED DELAYED EGRESS

ASSA ABLOY ACCENTRA™ is pleased to announce that the 7000 Series Exit Device now features improved Delayed Egress (D) functionality.

The new design maintains backwards compatible features and functions, along with a few new attributes that include additional nuisance delay and reset delay options. A new 8-position DIP switch has also been added, for easy feature selection. Field replacements will ship with the new PCBA Module along with harnesses for direct replacement to an existing device/rail (field re-wiring at electric hinge may or may not be required).

The new delayed egress device is UL-listed for both Fire and Panic Exit Devices and ANSI/BHMA Grade 1 certified (ANSI A156.3 and ANSI A156.24).

HOW TO ORDER:

To order on a new exit device, please specify -D in the order string.

EXAMPLE:

7150D-36 x 619 x RHR x SNB

For more information, please contact your ASSA ABLOY ACCENTRA™ Door Security Solutions sales representative.
