Announcement

ASSA ABLOY ACCENTRA™ INTRODUCES 7000 SERIES EXIT DEVICES WITH MOTORIZED ELECTRIC LATCH RETRACTION (MELR)

ASSA ABLOY ACCENTRA™ is pleased to announce that the 7000 Series Exit Device is now available with Motorized Electric Latch Retraction (MELR).

BENEFITS

The Motorized Electric Latch Retraction feature provides remote-controlled latch retraction that delivers quiet, smooth operation for convenient, hassle-free egress. Easily installed in new applications and available as retrofit rail kit assemblies for field updates, the MELR features maintenance-free design with few moving parts using 86% less power consumption during retraction than solenoid devices. Plus, MELR is powered by a standard power supply, simplifying installation and increasing system design flexibility.

HOW TO ORDER

To order on a new exit device, please specify -MELR in the order string.

Example: 7100MELR-36 x 619 x RHR x SNB

To order a retrofit kit for an existing exit device, please use RMELR x (Door Width) x (Options).

Example: RMELR x 36 x WS

RELATED DISCONTINUANCES

As we introduce Motorized Electric Latch Retraction, we will be discontinuing the former “P” latch pullback option solenoid and corresponding 782 power supply for use with the 7000 Series exit device. Please refer to the separate discontinuance notice for details.

For information on how to order the 7000 Series Exit Device with this great new feature, please refer to the complete product catalog at accentra-assaabloy.com
If you have any questions, please contact your ASSA ABLOY Door Security Solutions sales representative.
