WEATHER RESISTANT EXIT DEVICES

ASSA ABLOY ACCENTRA™ has introduced a solution to improve the weather resistance of 7000 Series exit devices. Available on mechanical rim exit devices only, weep holes can be drilled into the bottom of the exit rail, improving water drainage in exterior applications. Available in stainless steel finishes only (629 and 630), a clear powder coat finish must also be applied to the device.

The new weather resistant exit devices are protected by a two year warranty. This option is available via special application request. To order, include SPAR 05454 in the order string.

How to Order Example:
7100 x 36 x 630 x SPAR 05454
