READ INSTRUCTIONS FIRST!

These instructions show how to install the KV 8070 Series Pocket Door Slide. Please note that improper installation may void the Knape & Vogt Limited Lifetime Warranty.

If you have questions or need additional information, please contact Knape & Vogt customer service (800) 253-1561.

Step 1. Install Base Plates and Slides

- Install hinge bases as shown in Figure 3 , using #8-32 x 5/16" flat-head self-tapping screws provided for standard applications.
- Locate slide in upper inside corner of case as shown in Figure 2. Set back the slide from the front edge of the case by the amount shown in Figure 2. Repeat with lower slide.

Step 2. Follower Strip, Hinge Cup, & Hinge Installation

- Cut a follower strip 6" shorter than vertical door height. The follower strip should be cut from 3/4" thick x 3" wide stock. Fasten follower strip to slide bracket with (6) #6 x 13/32"pan-head self-tapping screws.

- For standard corner mounted slide installations, locate the horizontal centerline of the cup holes 1-1/2" from the top and bottom edge of the door. Use the appropriate TAB/DBE dimension and drill size per application chart shown in Chart 2.
  Bore cup holes.
  Always bore a test block first to verify hinge cup locations.

- Install hinge cups with #6x7/16" flat-head self-tapping screws provided.

Step 3. Door and Guide Block Installation

- Install Doors. Slowly retract, open and close each door, checking for proper operation and door alignment.

- Refer to Figure 8 for horizontal, vertical, and depth adjustments for hinge.

- Refer to Figure 6 for door glide location.

- Install two guide blocks per door using (2) #6 X 13/32" pan-head self-tapping screws per block.
